This follow-up report covers our analysis of the mortgages covered bond (*“Obbligazioni Bancarie Garantite”* or OBG) program issued under Italian law by Intesa Sanpaolo S.p.A. („Intesa Sanpaolo”). The total covered bond issuance at the cut-off date (30.09.2022) had a nominal value of EUR 45,860.00 m, backed by a cover pool with a current value of EUR 54,409.80 m. This corresponds to a nominal overcollateralization of 18.64%. The cover assets include Italian mortgages obligations in Italy.

Taking into consideration the issuer rating, our analysis of the regulatory framework, liquidity- and refinancing risks, as well as our cover pool assessment and results of the cash flow analysis, Creditreform Rating AG (*“Creditreform Rating”* or *“CRA”*) affirms the covered bond program with a A+ rating. The A+ rating represents a high level of credit quality and low investment risk.

Key Rating Findings

- + Covered Bonds are subject to strict legal framework for covered bonds
- + Covered Bond holders have full recourse to the issuer.
- + Impressive de-risking of portfolio of the issuer, continuously improving asset-quality
- High existing sovereign exposure to home market limits rating, exposure increased with acquisition of UBI Banca

Issuer Risk

Issuer

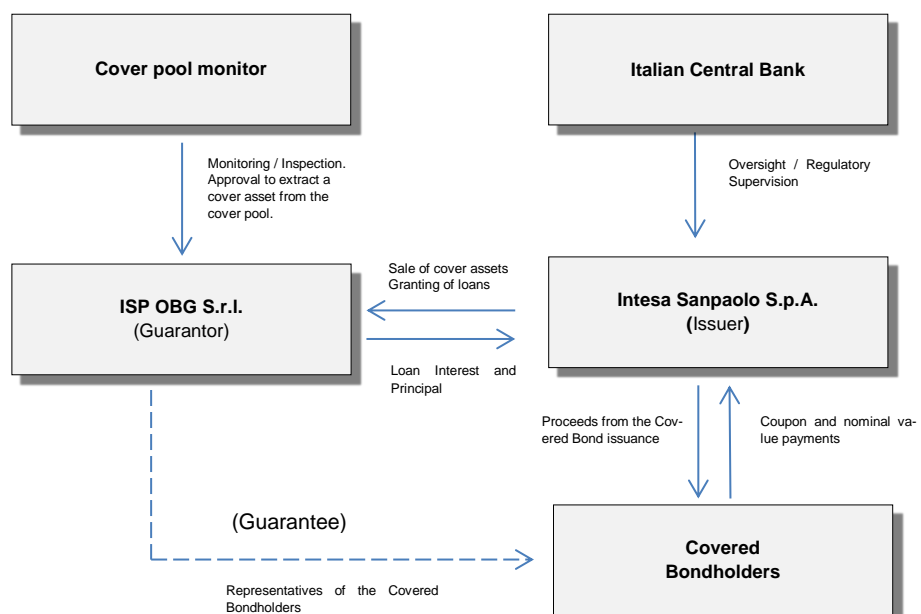

Our rating of Intesa Sanpaolo covered bond program is reflected by our issuer rating opinion of Intesa Sanpaolo S.p.A. (Group). CRA has affirmed the Long-term rating of Intesa Sanpaolo at BBB- in a Rating Update dated 12.10.2022 with stable outlook. Continued, heavy de-risking of its NPL portfolio and the rebound of profitability primarily explain the affirmation of the Long-Term Issuer Rating after the initial COVID-19 impact in 2020. The new strategic plan puts emphasis on further de-risking as well as operational efficiency to enhance profitability. In addition, further growth in fees and commissions is sought. The solid capitalization currently enables generous investor disbursements.

The bank's rating remains negatively impacted by the high dependence on the Italian home market and the low rating of the Italian Republic ('BBB- (stable)', CRA Sovereign Rating as of February 11, 2022). For a more detailed overview of the issuer rating, please refer to the webpage of Creditreform Rating AG.

Legal and Regulatory Framework

Italy has firstly incorporated covered bonds in the legal set-up in 2005 by amending the existing Italian securitization law (Law no. 130/1999) on the basis of two additional articles (Law no. 80/2005) dealing with the administration and issuance of Italian covered bonds ('Obbligazioni Bancarie Garantite' (OBG)). The European Commission on November 2019 adopted the legislative package to provide for enhanced harmonisation of the EU covered bond market. Each of the Member States were to implement the Covered Bond Directive by 8 July 2021 and the national measures to be applied at the latest from 8 July 2022. In response to that, Italy implemented the new covered bond framework by the legislative decree n. 190 of 5 November 2021.

The new framework applies to covered bonds issued after the entry into force of the further implementing provisions of the Bank of Italy. The covered bonds issued before the entry into the force of the new legislation, continue to be regulated by the previous Italian framework.

A comprehensive overview of the previous covered bond legislation that governs the OBG, can be found in our initial and follow-up rating reports of Intesa Sanpaolo Mortgage Covered Bonds. The following major provisions describe the status of the current covered bonds legislation in Italy.

The new framework has confirmed the structure of a covered bond transaction already in force. The bank of Italy verifies certain conditions and authorizes programs for the covered bond issuances. While Italian banks do not need a special license to issue covered bonds, they need to fulfil following prerequisites; i) own funds not lower than EUR 250 million; ii) a total capital ratio not lower than 9%. A credit institution delegates eligible cover assets to a special purpose vehicle (SPV), which grants a guarantee for the issued covered bonds in favour of the covered bond holders.

The covered bondholders have direct recourse to the issuer and a preferential claim to the cover pool assets secured primarily by residential mortgages, commercial mortgages, public sector loans and senior mortgage-backed securities, while issuers decide on the structure of cover pools on their own.

All assets transferred to the SPV are part of the cover pool. The geographical scope of legitimate mortgage assets and public sector assets is confined to EEA countries and to Switzerland, while regulatory arrangements are present to ensure that the cover assets are enforceable in the corresponding jurisdiction.

The Italian legal framework stipulates that an external asset monitor has to be nominated by the issuer to supervise the accuracy of the transactions, the soundness of the cover assets as well as the reliability of the covered bond guarantee in favour of the covered bond holders. The asset monitor must be an auditing firm possessing the necessary skills required to perform such duties and must be independent of the issuer and of any other person participating in the transaction.

In case of issuer default, the legal framework has set out duties and powers regarding the special administrative function - i.e. the ongoing management of the covered bonds - which is governed in an independent way and on behalf of the covered bond holders' preferential interests.

In general, we considered the structural framework in Italy as positive as the legal framework for OBG defines clear rules to mitigate risks in particular regarding insolvency remoteness, asset

segregation, investor's special claim vis-à-vis other creditors, the roll and appointment of a special administrator, among other provisions. Due to those reasons we have set a rating uplift of four (+4) notches for the structural framework for covered bonds in Italy under OBG.

Liquidity- and Refinancing Risk

The new legal framework has not raised the 0% minimum overcollateralization (OC) for Italian covered bond programs; however, the law permits the Bank of Italy to set minimum OC higher to comply with article 129 of the CRR using secondary legislations. Therefore, Italy requires issuing banks to have assets at least the same amount as the covered bonds outstanding on a nominal and a NPV basis.

Although no mandatory liquidity buffer were specified under the old framework, the new framework introduced a mandatory liquidity buffer, which covers the maximum cumulative liquidity outflow over the next 180 days. Additionally, nominal and present value coverage tests have to be undertaken every six months.

While coverage tests have to be conducted, there are no regulatory obligations for the issuers to perform specific stress tests on their covered bond programs. Derivatives can be an additional measure to hedge interest rate and currency risks. The updated law clarifies that derivative instruments must be concluded as hedging purposes only. However, the derivatives cannot be terminated upon issuer's default or the compulsory liquidation of the bank that issued the covered bonds.

In the event of the issuer's insolvency, the framework stipulates that the special administrator can sell assets of the cover pool or use them as a guarantee for liquidity operations if liquidity shortfalls are foreseeable.

In general, sufficient structural protection mechanisms for the liquidity and risk management have been established with the mandatory introduction of a liquidity buffer of 180 days, minimum overcollateralization and due to the possible postponement of maturities upto 12 months for the soft-bullet covered bonds. We assess the overall legal provisions on liquidity management for covered bonds (OBG) programs issued in Italy as positive and set a rating uplift of one (+1) notch.

ESG Criteria

CRA generally takes ESG-relevant factors (environmental, social and governance) into account when assessing Covered Bond ratings. Overall, ESG factors have a significant impact on the current rating of this Covered Bond program. CRA identifies governance factors, in particular, to have a highly significant impact on Covered Bond ratings. Since Covered Bonds are subject to strict legal requirements, regulatory risk plays an important role in assessing the credit rating.

The Italian legal framework for covered bonds defines clear rules to mitigate risks in particular regarding insolvency remoteness, investor's special claim vis-à-vis other creditors, among other provisions. Additionally, risk management and internal controls as well as macroeconomic factors such as hedging strategies, interest rates and yield curve are considered to have a highly significant impact on the assessment of the credit rating. Other individual factors with a potential key rating influence were not identified, and therefore did not affect the final rating.

Credit and Portfolio Risk

Cover pool analysis

The analysis of the cover pool is based on public information which has been made available by the Issuer, in particular the Harmonised Transparency Template („HTT“) as per regulatory requirements. This information was sufficient according to CRA´s rating methodology “Covered Bond Ratings”.

At the cut-off-date 30.09.2022, the pool of cover assets consisted of 606,089 debt receivables, of which 100.00% are domiciled in Italy. The total cover pool volume amounted to EUR 54,409.80 m in residential (89.89%), commercial (10.11%) and others (0.00%) loans.

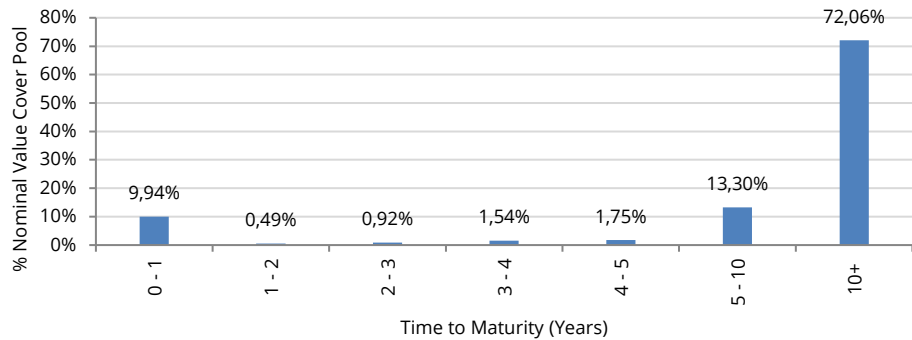

The residential cover pool consists of 560,423 mortgage loans having an unindexed weighted average LTV of 63.43%. The non-residential cover pool consists of 45,666 mortgage loans having an unindexed weighted average LTV of 52.24%. The ten largest debtors of the portfolio total to 0.25%. Table 2 displays additional characteristics of the cover pool:

Table 2: Cover pool characteristics | Source: Intesa Sanpaolo

Characteristics	Value
Cover assets	EUR 54,410 m.
Covered bonds outstanding	EUR 45,860 m.
Substitute assets	EUR 5319.15 m.
Cover pool composition	
<i>Mortgages</i>	90.22%
<i>Substitute assets</i>	9.78%
<i>Other / Derivative</i>	0.00%
Number of debtors	NR
Mortgages Composition	
<i>Residential</i>	89.89%
<i>Commercial</i>	10.11%
<i>Other</i>	0.00%
Average asset value (Residential)	EUR 78.74 k.
Average asset value (Commercial)	EUR 108.66 k.
Non-performing loans	0.0%
10 biggest debtors	0.25%
WA seasoning	82.37 Months
WA maturity cover pool (WAL)	6.01 Years
WA maturity covered bonds (WAL)	8.51 Years

We have listed an extended view of the composition of the cover pool in the appendix section “Cover pool details”. The following chart displays the maturity profile of the cover assets at the cut-off date 30.09.2022 (see figure 2):

Figure 2: Distribution by remaining time to maturity | Source: Intesa Sanpaolo

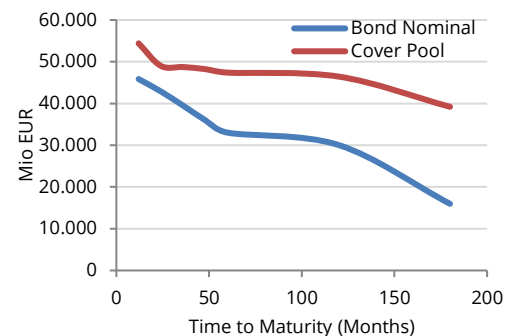

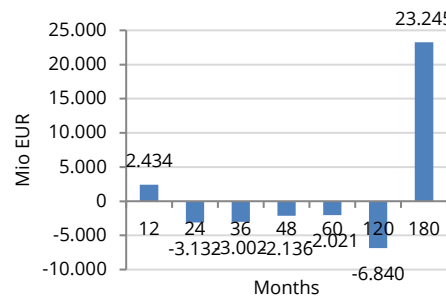

Maturity profile

The following charts present the cash flow profile of the Issuer (see figure 3 and figure 4):

Figure 3: Cover asset congruence | Source: Intesa Sanpaolo

Figure 4: Amortization profile | Source: Intesa Sanpaolo

During its cash flow modelling, CRA has taken into consideration the maturity structure of cover assets and liabilities. This structure was an integral part of the cash flow analysis.

Interest rate and currency risk

The legal framework does not stipulate any obligatory stress tests to anticipate interest rate and currency discrepancies. However, all the cover pool assets and covered bonds are denominated in euros. This program also uses derivatives to hedge interest rate risks. In our cash flow analysis we assume that the interest rate mismatches are fully hedged in the form of swap agreements. Therefore, CRA did not apply interest rate and foreign exchange stresses for the cash flows.

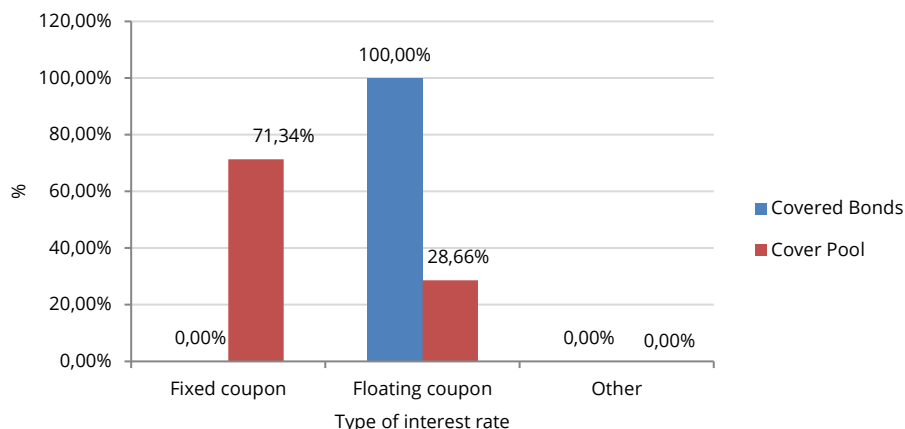

Table 3: Program distribution by currency | Source: Intesa Sanpaolo

Currency	Volume	Share (%)
<i>Cover Pool*</i>

Figure 5 shows the types of interest rate used in this program

Figure 5: Type of interest rate | Source: Intesa Sanpaolo

Credit Risk

The credit risk assessment for Mortgage Covered Bond have been determined in accordance with CRA rating methodology for Covered Bonds by means of historical data and particular parameters from the Covered Bonds.

Due to the high granularity of mortgage pools we have characterized these portfolios as big enough and with a homogeneous composition i.e. ("Large Homogeneous Portfolio", LHP). Furthermore, under that premise we have assumed that it is possible to derive a loss distribution. CRA has used the issuer's historical NPL ratios to derivate a conservative default rate proxy for the approximation through the LHP distribution. For the Intesa Sanpaolo it has been assumed an expected default rate of 4.71% for the LHP. Furthermore, CRA has considered a 15.00% correlation to define the LHP distribution. Table 4 disclosed the expected default rate for each relevant rating level.

In order to derive recovery and loss-severity base case assumption, CRA has used historical data from mortgage price indexes. To determine loan-level recovery assumptions the resulting stressed recoveries assumptions were compared with the portfolio's existing loan-to-value ratios (LTVs).

Based on the default rates and taking into account the recovery assumptions, the following loss assumptions were determined for the current cover pool. Compared to last rating update, expected loss decreased significantly due to improved stressed recovery assumptions. This is caused by the general improvements of the residential real estate market (see Table 4)

Table 4: Cover Pool Base case assumptions | Source: CRA

Rating	Default Rate (%)	Recoveries (%)	Expected Loss (%)
AA-	53.30%	74.25%	13.72%
A+	51.43%	76.10%	12.29%
A	51.41%	76.12%	12.28%
A-	50.48%	76.92%	11.65%
BBB+	49.32%	77.93%	10.89%

BBB	48.05%	79.08%	10.05%
BBB-	46.39%	80.64%	8.98%

Cash-Flow Analysis

Model Assumptions

Based on public information and using the base case loss assumptions, we implement a scenario-based cash flow model. This model aims to test the ability of the structure to service all covered bonds according to their payment profile in diverse stress scenarios. The CRA cash flow analysis assumes that the Issuer has defaulted, i.e. all obligations will be met using cash flows from the cover pool assets only. We also assume that no additional assets will be added to the cover pool during the wind-down phase.

The cash-flow analysis considers, among other factors, asset value haircuts (“asset-sale discount”), and the possible positive yield spread between covered assets and covered bonds (“yield spreads”). To derive the asset-sale discount, CRA assumes, based on secondary market data, a rating level haircut on the asset value. Furthermore, CRA, using available public information (i.e. issuer’s annual accounts), has derived estimations for yield spreads (see table 5):

Table 5: Cash-Flow Model assumptions | Source: CRA

Rating level	Asset-Sale Discount	Yield Spread
AA-	60.33%	0.85%
A+	57.70%	0.87%
A	55.54%	0.88%
A-	52.72%	0.90%
BBB+	49.72%	0.92%
BBB	46.81%	0.95%
BBB-	43.76%	0.97%

Rating Scenarios

In our cash flow model rating scenarios have been tested considering several central input parameters, such as:

- Portfolio composition (diversification, concentration, granularity)
- Probability of default of cover assets
- Correlations of cover assets and systematic risk factors
- Recoveries
- Maturity profile of covered bonds and cover assets (ALM)

Within a A- rating scenario, the cash flow model showed that obligations can be paid fully and in a timely manner. Overall, the cash flow analysis revealed that the portfolio, given all used information as of 30.09.2022, may ensure the repayment of bonds’ nominal capital notwithstanding the occurrence of the presented stressed scenarios.

Overcollateralization Break-Even Analysis

CRA also performed a break-even OC analysis taking into considerations the following drivers: ALM, Loss level, Interest rate spreads, foreign currency mismatches and Recoveries. Performing the break-even OC analysis, we took rating-level specific stressed outcomes into account. Based

on these analyses, the maximum OC required for each relevant rating level during the whole period has been presented in table 6.

Table 6: Breakeven Analysis | Source: CRA

Rating Level	Break-Even OC
A-	18.00%
BBB+	16.33%
BBB	14.63%
BBB-	12.65%
BB+	10.08%
BB	7.47%
BB-	4.95%

Sensitivity Analysis

CRA also evaluates the sensitivity of the structure and program with respect to important input parameters. In particular, the following factors have been varied:

- Credit quality of cover assets
- Recoveries

The following table presents the rating impact of a decline in recoveries and an increase in the credit risk of single debtors. Starting from the best-case, which is represented by our base case assumptions, the analysis reveals the sensitivity of the rating with respect to recovery rates and credit risk. The worst-case scenario, in which we reduce recoveries by 50% and increase credit risk by 50%, the impact can be seen by a reduction of the base case rating by 10 notches to CCC (see Table 7):

Table 7: Covered Bond Program Sensitivity: Credit Quality und Recovery Rates | Source: CRA

Recovery Defaults	Base Case	-25%	-50%
Base Case	A-	BB	B
+25%	BBB	BB-	B-
+50%	BBB-	B+	CCC

In general, based on the presented cash flow analysis results, the rating of the cover pool within our covered bond program rating has been set at A-. This, however, did not ensure any secondary rating uplift which has been set at zero (0) notch.

Counterparty Risk

Derivatives

It is our understanding that this program uses intra-group Interest rate swaps to hedge interest rate mismatches.

Commingling

Incoming cash flows generated from the cover pool will normally be transferred to the Issuer / Guarantor and will be forwarded to the covered bond holders according to the payment terms and conditions. Should the Servicers become insolvent, the covered bond Guarantor is subject to the risk (“commingling risk”) that funds may not be returned and commingled with the insolvency estate of the servicers. In order to avoid such risk, the Servicing Agreement includes provisions that, the Servicers must pay all Collections into the account of Covered Bond Guarantor within the second business day following the relevant collection.

Regulatory and Legal Disclosures

Creditreform Rating AG was neither commissioned by the rating object nor by any other third parties for the rating. The analysis took place on a voluntary basis by Creditreform Rating AG and is to be described in the regulatory sense as an unsolicited rating. The rating was conducted on the basis of Creditreform Rating's "[Covered Bond Ratings" methodology \(v1.1, April 2022\)](#) and "[Technical Documentation Portfolio Loss Distributions" \(v.1.0, July 2018\)](#) in conjunction with Creditreform's basic document "[Rating Criteria and Definitions" \(v1.3, January 2018\)](#). On the subject of ESG (environment, social and governance), Creditreform Rating AG has published the basic document "[The Impact of ESG Factors on Credit Ratings" \(March 2020\)](#).

Unsolicited Credit Rating

With Rated Entity or Related Third Party Participation	NO
With Access to Internal Documents	NO
With Access to Management	NO

The rating is based on publicly available information and internal evaluation methods for the rated bank and program. The issuer's quantitative analysis is based mainly on the latest annual accounts, interim reports, other information of the bank pertaining to investor relations, and key figures calculated by CRA/ eValueRate. The cover pool's quantitative analysis for the rated Covered Bond Program was based on the "Harmonised Transparency Template" (HTT) published by the Intesa Sanpaolo.

A complete description of Creditreform Rating's rating methodologies and Creditreform's basic document "Rating Criteria and Definitions" is published on the following internet page:

www.creditreform-rating.de/en/regulatory-requirements/

This rating was carried out by analysts Aaron Kamruzzaman (Senior Analyst) and Paul Zinn (Analyst) both based in Neuss/Germany. On 02.12.2022, the rating was presented to the rating committee by the analysts and adopted in a resolution. The function of Person Approving Credit Ratings (PAC) was performed by Christian Konieczny (Senior Analyst).

On 02.12.2022, the rating result was communicated to Intesa Sanpaolo, and the preliminary rating report was made available. The Issuer and all relevant parties examined the rating report prior to publication and were given at least one full working day to appeal the rating committee decision and provide additional information. The rating decision was not amended following this examination.

The rating is subject to one-year monitoring from the creation date (see cover sheet). Within this period, the rating can be updated. After one year at the latest, a follow-up is required to maintain the validity of the rating.

In 2011 Creditreform Rating AG was registered within the European Union according to EU Regulation 1060/2009 (CRA-Regulation). Based on the registration Creditreform Rating AG (CRA) is permitted to issue credit ratings within the EU and is bound to comply with the provisions of the CRA-Regulation.

Endorsement

Creditreform Rating did not endorse the rating according Article 4 (3), CRA-Regulation.

Conflict of Interests

No conflicts of interest were identified during the rating process that might influence the analyses and judgements of the rating analysts involved or any other natural person whose services are placed at the disposal or under the control of Creditreform Rating AG and who are directly involved in credit rating activities or approving credit ratings and rating outlooks.

In the event of provision of ancillary services to the rated entity, CRA will disclose all ancillary services in the credit rating report of the issuer.

Rules on the Presentation of Credit Ratings and Rating Outlooks

The approval of credit ratings and rating outlooks follows our internal policies and procedures. In line with our policy "Rating Committee," all credit ratings and rating outlooks are approved by a rating committee based on the principle of unanimity.

To prepare this credit rating, CRA has used following substantially material sources:

1. Transaction structure and participants
2. Transaction documents
3. Issuing documents
4. Other rating relevant documentation

There are no other attributes and limitations of the credit rating or rating outlook other than displayed on the CRA website. Furthermore, CRA considers satisfactory the quality and extent of information available on the rated entity. In regard to the rated entity, Creditreform Rating AG regarded available historical data as sufficient.

Between the disclosure of the credit rating to the rated entity and the public disclosure no amendments were made to the credit rating.

The rating report and/or Press release indicate the principal methodology or version of methodology that was used in determining the rating, with a reference to its comprehensive description.

In cases where the credit rating is based on more than one methodology, or where reference only to the principal methodology might cause investors to overlook other important aspects of the credit rating, including any significant adjustments and deviations, Creditreform Rating AG explains this fact in the credit rating and indicates how the different methodologies and other

aspects are taken into account in the credit rating. This information is integrated in the credit rating report.

The meaning of each rating category, the definition of default or recovery, and any appropriate risk warning, including a sensitivity analysis of the relevant key rating assumptions, such as mathematical or correlation assumptions, accompanied by worst-case scenario credit ratings as well as best-case scenario credit ratings, are explained.

The date at which the credit rating was released for distribution for the first time and when it was last updated including any rating outlooks, is indicated clearly and prominently in the rating report and/or Press Release as a "Rating action"; first release is indicated as "initial rating", other updates are indicated as an "update", "upgrade or downgrade", "not rated", "confirmed", "selective default" or "default".

In the case of a rating outlook, the time horizon is provided during which a change in the credit rating is expected. This information is available within the rating report and/or Press Release.

In accordance to Article 11 (2) EU-Regulation (EC) No 1060/2009 registered or certified credit rating agency shall make available in a central repository established by ESMA information on its historical performance data, including the ratings transition frequency, and information about credit ratings issued in the past and on their changes. Requested data are available at the ESMA website: <https://cerep.esma.europa.eu/cerep-web/statistics/defaults.xhtml>.

An explanatory statement of the meaning of Creditreform`s default rates are available in the credit rating methodologies disclosed on the website.

Disclaimer

Any rating performed by Creditreform Rating AG is subject to the Creditreform Rating AG Code of Conduct which has been published on the web pages of Creditreform Rating AG. In this Code of Conduct, Creditreform Rating AG commits itself – systematically and with due diligence – to establish its independent and objective opinion as to the sustainability, risks and opportunities concerning the enterprise or the issue under review.

Future events are uncertain, and forecasts are necessarily based on assessments and assumptions. This rating is therefore no statement of fact, but an opinion. For this reason, Creditreform Rating AG cannot be held liable for the consequences of decisions made on the basis of any of their ratings. Neither should these ratings be construed as recommendations for investors, buyers or sellers. They should only be used by market participants (entrepreneurs, bankers, investors etc.) as one factor among others when arriving at corporate or investment decisions. Ratings are not meant to be used as substitutes for one's own research, inquiries and assessments.

We have assumed that the documents and information made available to us by the client are complete and accurate and that the copies provided to us represent the full and unchanged contents of the original documents. Creditreform Rating AG assumes no responsibility for the true and fair representation of the original information.

This report is protected by copyright. Any commercial use is prohibited without prior written permission from Creditreform Rating AG. Only the full report may be published in order to prevent distortion of the report's overall assessment. Excerpts may only be used with the express consent of Creditreform Rating AG. Publication of the report without the consent of Creditreform Rating AG is prohibited. Only ratings published on the Creditreform Rating AG web pages remain valid.
