Rating summary:

Creditreform Rating (CRA) has confirmed the unsolicited corporate issuer rating of Eurogrid GmbH at A and set the outlook to stable. The addition of Watch UNW has been omitted.

The rating methodology "Corporate Rating", updated on July 1, 2022 with the revised industry analysis, has a positive effect on the rating of Eurogrid GmbH. We have, however, noticed, as expected in our previous rating (A / negative, CRA March 11, 2022), a slight deterioration in the result of our key figure analysis based on the 2021 consolidated financial statements. This, together with the considerable uncertainty linked to the broadly rising energy and raw material prices and disrupted supply chains resulting from the tense geopolitical situation, has a dampening effect on the rating result. Coupled with the expected expansion of the investment volume in the course of accelerated growth, along with the associated debt, the current situation does not allow for an increase in the rating for the time being as a result of the overall favorable industry assessment. Developments in 2022, according to published information, do not indicate any further deterioration in the Company's fundamentals. For this reason, and taking into consideration the rating of Elia Group NV/SA, the outlook is set to stable.

The controlling shareholder of Eurogrid GmbH is Elia Group NV/SA (A / stable, CRA December 19, 2022), based in Belgium, with 80% of the Group's share capital. As Elia Group NV/SA has a large influence on the Company's financials and strategic alignment, the rating of Eurogrid GmbH is constrained by the rating of Elia Group NV/SA. The remaining 20% is indirectly owned by the German government via the KfW, which has a slightly positive influence on the corporate rating.

Primary key rating drivers:

- Adjustment of the rating system leads to a positive assessment of the industry risks
- Expected slight deterioration in the result of our financial key figure analysis based on the 2021 financial statements
- Expansion of debt and costs in the course of increased investment volume and accelerated growth
- General uncertainty related to inflationary conditions, disrupted supply chains and rising interest rates

ESG-criteria:

CRA generally takes ESG factors (environment, social and governance) into account within its rating decisions. In the case of Eurogrid GmbH we have not identified any ESG factors with significant influence.

The approval of credit ratings and rating outlooks follows our internal policies and procedures. In line with our "Rating Committee Policy", all credit ratings and rating outlooks are approved by a rating committee based on the principle of unanimity.

To prepare this credit rating, Creditreform Rating AG has used following substantially material sources:

Corporate issuer rating:

1. Annual report
2. Website
3. Internet research

Corporate issue rating:

1. Corporate issuer rating incl. information used for the corporate issuer rating
2. Documents on issues / instruments

There are no other attributes and limitations of the credit rating or rating outlook other than those displayed on the Creditreform Rating AG website. Furthermore, Creditreform Rating AG considers as satisfactory the quality and extent of information available on the rated entity. With respect to the rated entity, Creditreform Rating AG regarded available historical data as sufficient.

Between the time of disclosure of the credit rating to the rated entity and the public disclosure, no amendments were made to the credit rating.

The Basic Data Information Card indicates the principal methodology or version of methodology that was used in determining the rating, with a reference to its comprehensive description.

In cases where the credit rating is based on more than one methodology or where reference only to the principal methodology might cause investors to overlook other important aspects of the credit rating, including any significant adjustments and deviations, Creditreform Rating AG explains this fact in the credit rating report and indicates how the different methodologies or other aspects are taken into account in the credit rating. This information is integrated in the credit rating report.

The meaning of each rating category, the definition of default or recovery and any appropriate risk warning, including a sensitivity analysis of the relevant key rating assumptions such as mathematical or correlation assumptions, accompanied by worst-case scenario credit ratings and best-case scenario credit ratings are explained.

The date at which the credit rating was initially released for distribution and the date when it was last updated, including any rating outlooks, is indicated clearly and prominently in the Basic Data Information Card as a "rating action"; initial release is indicated as "initial rating", other updates are indicated as an "update", "upgrade" or "downgrade", "not rated", "confirmed", "selective default" or "default".

In the case of a rating outlook, the time horizon is provided during which a change in the credit rating is expected. This information is available within the Basic Data Information Card.

In accordance with Article 11 (2) EU-Regulation (EC) No 1060/2009, a registered or certified credit rating agency shall make available, in a central repository established by ESMA, information on its historical performance data including the rating transition frequency and information about credit ratings issued in the past and on their changes. Requested data are available at the ESMA [website](#).

An explanatory statement of the meaning of Creditreform Rating AG's default rates are available in the credit rating methodologies disclosed on the website.
